Source cases
(14 records)
case library
Contract 1
params-record
schema and rules
Stages
preprocess, features,
infer (24 methods)
Gates
lane, expected
ranges, units
Contract 2
index, manifests,
traces
Training (offline, GPU)
cgh-net, warm start,
held-out metrics
Benchmark protocol
7 geometries, 20 seeds,
fronts, skipped cells
Committed artifacts
data/derived, models
(readiness judges 11 rows)
Readiness document
computed from the
catalog: six states
Replay lane
static site reads the
committed artifacts
Live lane
TypeScript engine in a
Web Worker, parity-tested
API lane (dormant)
GET only; 503 with the
declared state
